

TOWN OF HAMPSTEAD

HAMPSTEAD, NEW HAMPSHIRE

Originally, **SFC Engineering Partnership, Inc.**, was retained by the Town of Hampstead Conservation Commission in 1986 to perform on-site inspections of wetland filling violations. As a result of the exemplary engineering services provided to the Conservation Commission, **SFC** was subsequently retained by the Hampstead Planning Board to perform regular consulting engineering services for the town including, but not limited to, engineering review of subdivisions and site plans submitted to the Planning Board for approval, construction inspections, providing letters and reports of recommended action to the Board, and preparation of bond estimates. Engineering review services for the Town of Hampstead are performed for residential, commercial and industrial subdivisions, as well as residential and non-residential site plans. All plans are reviewed by **SFC** for conformance with Town of Hampstead subdivision, site plan and zoning regulations and requirements.

In addition to the Planning Board, **SFC** currently provides engineering advisory and consulting services to the Board of Selectmen, Town Highway Department, Fire Department, Code Enforcement Officer and Conservation Commission.
