

# CANOBIE LAKE PARK

SALEM, NEW HAMPSHIRE

**SFC Engineering Partnership, Inc., (SFC)** has been providing professional services to Canobie Lake Park in Salem, NH since George Fredette, founding Principal and Vice President of **SFC**, was first retained as Facility Engineer in 1988. **SFC** has worked on a variety of projects, both large and small, for this well-known family amusement park and has, over the years, used the expertise of the entire SFC team.

Projects have included work on popular rides like Canobie's newest water attraction, Castaway Island as well as Timber Splash, The Boston Tea Party, The Giant Sky Wheel and Star Blaster. Less obvious work has been done too: water line mapping, sewer systems design, permitting, inspections, and wetlands evaluations.

A variety of engineering services have been provided including conceptual planning, structural, fire protection and civil engineering, state and local permitting, and site plan design, as well as land surveying. SFC's team has provided, and continues to provide, professional services relative to nearly every aspect of the park.
