

# U.S. SPEEDWAY

## LEE, NEW HAMPSHIRE

When the local Fire Chief questioned spectator safety at the popular Lee USA Speedway (located on NH Route 125), **SFC Engineering Partnership, Inc.'s (SFC's)** Fire Protection Engineers were chosen to provide code evaluation services. Code evaluation services were needed for the electrical wiring as well as off track areas including bleachers, grandstands and concession stands. After a thorough evaluation, **SFC** provided a report of the Life Safety Code Study. In addition to supplying an evaluation and report, **SFC** held meetings with track owners and fire officials to facilitate implementation of the recommendations and conducted construction inspections during renovation. Ultimately, **SFC's** experience and expertise in Fire Protection Engineering allows Lee USA Speedway to operate a far safer venue for its racing enthusiasts.
