

# NEWINGTON STATION

## NEWINGTON, NH

SFC Engineering Partnership, Inc. (SFC) was subcontracted by fire protection consultants Dean & Allyn, Inc. to provide fire protection engineering services at the Newington Energy Plant. After discussion, approval of design approaches, SFC reviewed the as-built sprinkler plans and drawings and compared them to the hydraulic calculations for the systems. A report and recommendations were provided.

Newington Station is PSNH's largest single-unit fossil fuel-fired generating plant. Capable of burning both natural gas and oil, the facility supplies two hundred thousand (200,000) residential, commercial and industrial customers.
