

N. MAIN ST. & E. BROADWAY

SALEM, NEW HAMPSHIRE

SFC Engineering Partnership Inc., (SFC) was selected by the Town of Salem, NH to assist in the reconstruction of North Main Street and East Broadway. The scope of work was divided into phases; existing conditions, design, wetlands permitting, public presentations, contract administration and construction administration.

Our Surveying Department collected field data to:

- explain existing conditions
- locate wetlands
- collect topographic information for re-alignment of intersections
- profile subsurface conditions
- identify potential problems, create solutions and establish design criteria prior to preliminary design

Geometric design and technical specifications were prepared by SFC's Civil Engineering Division to:

- assist in designing vertical roadway alignment
- specify drainage improvements
- improve horizontal alignments at intersections
- prepare construction cost estimates

SFC's team prepared for and represented the project at public meetings. Specific tasks included:

- publicly addressing abutter concerns and questions
- preparation and representation of applications for all required local, state and federal wetlands permits
- addressing the concerns of the Town's Conservation Commission

SFC prepared bid documents, helping the Town of Salem through the procedures necessary to begin the construction phase of the project.

- SFC attended all meetings connected with the bidding process
- SFC made recommendations to the Town and assisted in completing contract negotiations with the Town's selected contractor

Construction administration is now in progress and includes:

- preparation for and representation at more meetings
- review of shop drawings
- review of pay requisitions
- site inspections and reports
- construction progress reports
- any other administrative duties which may arise
