

JOHNNY PRESCOTT OIL

CONCORD, NEW HAMPSHIRE

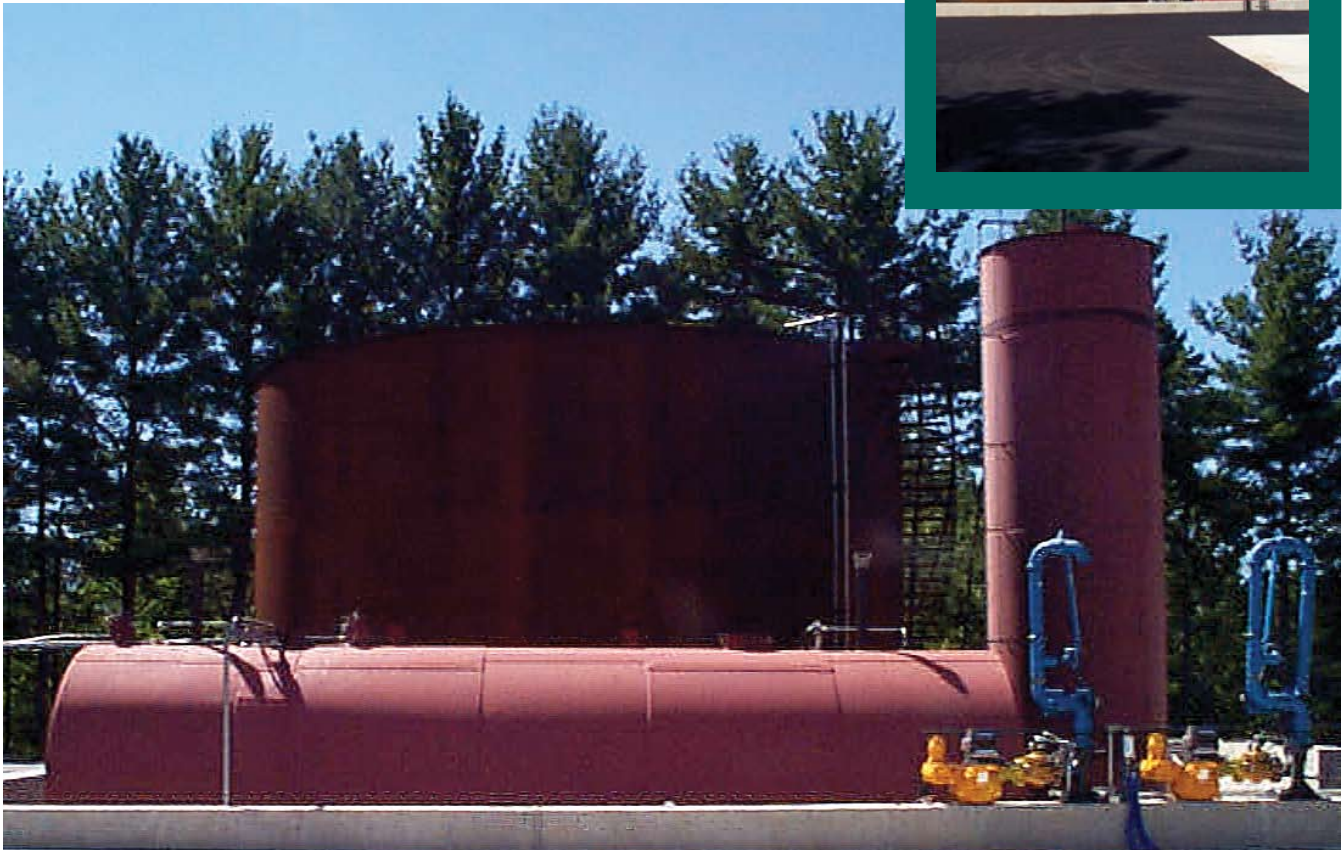

SFC Engineering Partnership, Inc., (SFC) was retained by Johnny Prescott Oil to develop plans for a bulk fuel facility. The new facility, part of Prescott Oil's expansion plan, is located on Terrill Park Drive in Concord, New Hampshire.

The property has three 20,000-gallon tanks and one 150,000-gallon tank. A dispensing island is located on site for use by the company's delivery trucks. Provisions were made for the future construction of an office building on-site. **SFC** prepared the necessary documentation for approval by the City of Concord and New Hampshire Department of Environmental Services.
