

PRESSTEK, INC.

HUDSON, NEW HAMPSHIRE

SFC Engineering Partnership, Inc., (SFC) was retained by PRESSTEK, INC. of Hudson, New Hampshire to participate in the programming and development of a new fifty-thousand (50,000) SF manufacturing facility.

SFC was responsible for the structural framing design for the new building based on a conceptual layout provided by Berard Architects. The structural design used both braced and moment frames for the building support. Steel joists and joist-girders were used for the floor and roof supports. Forty-foot (40'-0") clear spans were provided. Vaulted steel framing was designed for the front entry. Complete connection details, foundation, footing and slab design, as well as installation and fabrication requirements were also provided.

SFC was also responsible for construction administration duties including shop drawing reviews and site inspections.

PRESSTEK, INC., is a leading developer and manufacturer of digital laser imaging and chemistry free plate technologies for the printing and graphic arts industries.
