

SACO RIVER BRIDGE

CONWAY, NEW HAMPSHIRE

SFC Engineering Partnership, Inc., (SFC) provided fire protection engineering services (sprinkler design) for the Saco River Covered Bridge, a National Register of Historic Places site. This bridge carries East Side Road over the Swift River just a short distance north of Conway Center. Originally built in 1890, the covered portion of the bridge is 224'-9" long, consisting of two spans. The bridge width is 30'-4", the roadway width is 18'-3". The truss is a Paddleford with added Arches.
