

SHAKER TABLE RESTAURANT

CANTERBURY, NEW HAMPSHIRE

SFC Engineering Partnership, Inc., was retained by Christopher P. Williams Architects of Meredith, New Hampshire to provide structural engineering services in the design of a restaurant at the historic Shaker Village in Canterbury, New Hampshire.

The restaurant is reconstructed on the same site as the historic circa 1811 Blacksmith Shop. Some of the structural challenges included HVAC equipment supported by roof trusses and several framing demands to accommodate the layout.
