

STAR ISLAND CORPORATION

STAR ISLAND, RYE, NH

In 2002, **SFC Engineering Partnership, Inc. (SFC)** began consulting with Star Island Corporation (SIC) to bring the island facilities into compliance with the NH State Fire Code. **SFC** worked with SIC to produce a plan of action. Items such as egress, fire alarm systems, sprinkler systems and emergency lighting were all addressed.

The **SFC** report of 2002 and the plan of action primarily focused on the hotel and the needed upgrades to that building. In 2007, findings showed that the first phase of the island upgrade would be soon be complete. The second phase of the upgrade will focus on the numerous smaller buildings located on the island. **SFC** intends to perform the needed site inspections on the out-buildings during the 2007 season and, in conjunction with SIC, create a new plan of action. **SFC** expects to have that plan completed and approved by all parties by the end of 2007. Starting in spring of 2008, work will begin on phase two.
